

Second Sanctuary Ocean Count and Great Whale Count for the 2025 Season Completed!

February 22, 2025

Contact: (O'ahu, Hawai'i, Kaua'i, Moloka'i) Cindy Among-Serrao, 808-351-4846
(Maui) Jens Currie, 808-990-5544

Sanctuary Ocean Count and Great Whale Count volunteers observe koholā, humpback whales from Kaua'i, O'ahu, Moloka'i, Hawai'i and Maui.

498 volunteers gathered data from the shores of Kaua'i, O'ahu, Moloka'i and Hawai'i islands during the Hawaiian Islands Humpback Whale National Marine Sanctuary Ocean Count and from Maui during the Great Whale Count by Pacific Whale Foundation, the second of three coordinated whale counts between the two organizations in 2025.

This is the seventh year that both counts are coordinated on the same days, ensuring the data from all the main Hawaiian Islands are collected simultaneously.

Volunteers collected data from 44 sites across all the main Hawaiian Islands on February 22. A total of 262 whales were observed during the 9:30 - 9:45 am time period, the most of any time period throughout the day's count.

On Kaua'i, the total number of whales observed during the day's count was 321, on O'ahu, the total was 408, on Moloka'i, the total was 153 and Hawai'i 263. The total number for the Great Whale Count on Maui was 802, for a grand total of 1947 throughout the main Hawaiian Islands. This number may represent duplicate sightings of the same whale by different observers or at different time periods or different locations throughout the day.

Data collected during the Sanctuary Ocean Count and Great Whale Count combined with other research efforts can help reveal trends in humpback whale occurrence within and amongst whale seasons.

Across the main Hawaiian Islands, weather conditions were ideal for observing whales being mostly sunny with light winds and calm seas. A variety of other species were also spotted during the count including honu (green sea turtles), nai'a (spinner dolphins), 'Ilioholoikauaua (Hawaiian monk seal), mālolo (Hawaiian flying fish) and multiple bird species such as 'iwa (great frigatebird), mōlī (Laysan albatross), 'auku'u (black-crowned night heron), 'a (brown booby), manu-o-Kū (white tern), and more.

Ocean Count promotes public awareness about humpback whales, Hawaiian Islands Humpback Whale National Marine Sanctuary, and shore-based whale watching opportunities. Site leaders tally humpback whale sightings and document the animals' surface behavior during the survey, which provides a snapshot of humpback whales' activity from the shorelines of Kaua'i, O'ahu, Moloka'i and Hawai'i islands. Ocean Count is supported by the National Marine Sanctuary Foundation.

The Great Whale Count by Pacific Whale Foundation had site leaders count whales from shore as part of a long-term survey of humpback whales in Hawai'i, with 12 survey sites along the shoreline of Maui and a site on the shoreline of Lāna'i. This event provides a snapshot of trends

in relative abundance of whales and is one of the world's longest-running community science projects.

Both counts take place three times during peak whale season annually on the last Saturday in January, February, and March.

Preliminary data detailing Sanctuary Ocean Count whale sightings by site location are available at: <https://oceancount.org/resources/>. Additional information is available on the sanctuary's website at <http://hawaiihumpbackwhale.noaa.gov>.

Pacific Whale Foundation's Great Whale Count data may be found at <https://www.pacificwhale.org/research/community-science/> with additional information at www.mauiwhalefestival.org

Hawaiian Islands Humpback Whale National Marine Sanctuary, administered by NOAA's Office of National Marine Sanctuaries and Hawai'i DLNR's Division of Aquatic Resources, protects humpback whales and their habitat in Hawaiian waters where they migrate each winter to mate, calve, and nurse their young.

With a mission to protect the ocean through science and advocacy, and to inspire environmental stewardship, Pacific Whale Foundation (PWF) conducts Research, Education and Conservation programs for the communities in which it serves. Founded by Greg Kaufman in 1980 as a 501(c)(3) nonprofit organization dedicated to saving the world's whales from extinction, PWF now operates a social enterprise that offers fee-based programs and services through PacWhale Eco-Adventures to help fund its nonprofit work. Combined with memberships, donations, charitable grants and a remarkable group of dedicated volunteers, PWF now reaches more than 400,000 individuals each year through its Maui and Australia offices and research projects in Ecuador and Chile.

The National Marine Sanctuary Foundation, established in 2000, is the official non-profit partner of the National Marine Sanctuary System. The Foundation directly supports national marine sanctuaries by protecting species, conserving ecosystems and preserving America's maritime heritage through on-the-water conservation projects, public education and outreach programs and scientific research and exploration.
